Les Sorbet Advanced Care Iced Sérum for Face Review

CATHERINE GAMBRELL

SKIN

WHAT IT IS

A frozen anti-aging serum

WHAT IT DOES

Hydrates and firms skin

KEY INGREDIENTS:

Hydrolyzed elastin and collagen (moisturize and help strengthen skin's structure)

HOW IT FEELS/SMELLS/LOOKS:

You keep this serum in your freezer, so it feels supercold going on, but it sure beats a messy medicine dropper. It immediately melts on your skin, then you rub it in like a regular serum.

WHY WE LIKE IT:

Applying serum direct from your freezer takes some getting used to, but it has a noticeable tightening effect on skin. It's a potent wake-up call—we like it best for morning use.
