

MY 12 FAVORITE LUXURY (AND MOSTLY GREEN) BEAUTY PRODUCTS

AUGUST 9, 2017

I have gone clean, green or organic in most areas of my life over the past year. It started with beauty when I learned last fall I had developed skin allergies to many of the ingredients found in skincare, beauty and makeup products. Now these changes have extended to my nutrition. But luxury beauty products are my guilty pleasure.

When it comes to skincare I have to be very careful to read the ingredients and I now know what things irritate my skin, but some of those things can be found in nature too so I have to be extra careful. However, I have found if I stick to organic, sensitive skin and hypo-allergenic lines I am pretty much in the clear. I am fortunate I get to try many different brands at every possible price point. I have been focusing a lot on drugstore beauty lately because who doesn't want to save a buck or two? And while I have been able to find so many great products at lower price points, sometimes you just can't cut corners.

One site I find myself turning to because they have such an amazing selection of clean, organic and vegan skincare is Space NK. They are not paying me to say this so this is my honest, unbiased opinion. Yes, you can find many of the same lines at Sephora and Nordstrom, but this is the one site where you can find them all and they carry many lines the other two sites/stores don't. You can also search Space NK's site for products based on your specific needs like vegan, anti-aging and redness.

So here are some of my favorite luxury skincare picks of the moment and most can be found at Space NK. A few you will have to shop at the brand's site.

VOTRE VU Les Sorbet Frozen Sérum for the Face, \$140

This is the coolest (pun intended) anti-aging serum ever! Les Sorbet is a French wonder sérum for any area of the face and neck that needs a lift. It's perfect for hot summer days because you store it in the freezer. It's like a frozen pop-up ice stick that's richly activated with 40% anti-aging marine superstars including elastin and collagen and is blended with muscle relaxing vegetable peptides. It feels great, smells even better and works extremely well.
