

PREP, PRIME AND FINISH FOR FLAWLESS SKIN

 MARIANNE MEISSNER • SEPTEMBER 1, 2017

I am asked, almost on a daily basis, what type of makeup I'm wearing or how I get my makeup to last all day.

It seems to be a common struggle among all beauty lovers: How do I get my face to look as great at the end of a long day as I did in the morning? Is it because I only use expensive makeup? No, in fact my professional makeup kit and my makeup station at home contain as many drug-store and inexpensive makeup brands as they do department store and high end items. The secret isn't how expensive the foundation or blush is, the secret is how well it's applied and how well the skin was treated before makeup application. Remember, everyone's skin is so unique, and it's really important to pay attention to your trouble areas and treat them daily.

2. Votre Vu Peau Equilibree (Oily Skin) \$52

A concentrated gel-sérum of plant and marine extracts that diffuses inflammation, regulates sebum production, and restores the equilibrium of your natural pH level. Pat this gel serum into skin rather than rub in circular motions. Pro Tip: Use after moisturizer has settled into skin and absorbed completely.
